The following is an Examiner's Statement of Reasons for Allowance

Regarding independent claim 1, the prior art fails to show a system including a server computer; a transmission medium coupled to the server computer, and a client computer coupled to the transmission medium, the client computer including a log to store billing entries and a security component having exclusive access to the log to enter the billing entries into the log and to secure the log in the manner and complexity recited by the claims. Regarding independent claim 12, the prior art fails to show a method including generating a billing record at a computer system; receiving the billing record at a security component within the computer system, the security component inserting the billing record into a log; and encrypting the log in the manner and complexity recited by the claims. Regarding independent claim 18, the prior art fails to show a method including receiving an encrypted billing log at a server computer from a client computer via a secure back channel; decrypting the billing log at a security component within the server computer; and storing the billing log at a database in the manner and complexity recited by the claims. Regarding independent claim 23 the prior art fails to show a software product having one or more recordable media having stored thereon executable instructions which, when executed by a processing device, causes the processing device to receive an encrypted billing log at a server computer from a client computer
